Graphisoft Announces Phase 3 Conditions of its Subscription Conversion Program

Graphisoft subscriptions provide easy, affordable access to always-up-to-date BIM technology and cloud collaboration for architects and designers.

BUDAPEST, January 6, 2026—Graphisoft, the leading Building Information Modeling (BIM) software solution developer for architecture and multidisciplinary design, today announced the conditions of its Phase 3 conversion terms starting April 1, 2026.

As announced in [April 2024](#), further detailed in [September 2024](#), and again in [November 2025](#), existing customers holding Archicad perpetual license(s)

with active SSA/FWD maintenance contracts can convert their licenses to Archicad subscriptions under preferential terms.

The third phase of Graphisoft's multi-year **SSA-to-Subscription Conversion Program** will start on April 1, 2026, and will run for a full 12-month cycle till March 31, 2027. The main change to the current Phase 2 conditions is that during Phase 3, customers' SSA/FWD contracts will lapse at the end of their next term, independent of their decision about converting their licenses to subscriptions; thus, converting them to a subscription will be the only way to keep their licenses current with future Archicad updates. Please note that local conditions and timelines may vary.

"Technology in the AEC industry is evolving at lightning speed," said **Daniel Csillag, Graphisoft CEO**. "Shifting our product delivery model to subscription allows users to take advantage of agile, responsive, and up-to-date software solutions – as soon as they hit the market," he added. "We also understand that price stability and long-term predictability are essential to our customers' success; therefore, unless there are significant shifts in economic or market conditions, we intend to implement modest, predictable annual adjustments to align our conversion subscriptions with the long-term list price gradually."

Customers are encouraged to visit the [SSA/FWD Conversion to Subscription webpage](#) for details on Graphisoft's subscription conversion program.
