GRAPHISOFT BIMx Wins 2020 Best of Products Award

With BIMx, Archicad users can drive the design narrative on the building site for fast, specific client feedback, saving time and money.

BUDAPEST, October 5, 2020 – BIMx, GRAPHISOFT’s award-winning presentation and communication app, has won the Architect’s Newspaper 2020 Best of Products Award in the Design and Construction Software category. Editors singled out BIMx for its power to bring a meaningful BIM experience to all stakeholders in the building design, delivery, and operations

lifecycle.

Developed to bridge the gap between the design studio and the construction site, [BIMx](#) brings a game-like navigation experience when exploring a building model. This technology improves the understanding of project deliverables and keeps all team members on task. Archicad users benefit from the unique advantage of its 3D visualization engine, which allows users to display and explore BIM models without size limits. Available for both iOS and Android users, on most popular web browsers and desktops, BIMx gives anywhere, anytime access to real-time model cut-throughs, in-context measuring and project markups in the model context.

“BIMx helps us keep track of the details that can get missed even with the best of intentions,” said Peter Twohy, Principal Architect at 2e Architects. “We just pull up the model on a tablet and provide contractors direct access to the file,” he added.

Dr. Adam Polcyn, jury member and Vice President of Research and Development at Vitro Architectural Glass said “...BIMx brings truly impressive functionality to architects and design professionals. Providing even large 2D and 3D files to clients and contractors via mobile device is just the beginning of the BIMx capability. This tool has the potential to remove ambiguity, misunderstanding and costly surprises, better fulfilling the promise of BIM.”

“On the job site or during presentations, on a tablet or a desktop, BIMx engages users with any BIM from anywhere,” said Akos Pfemeter, Vice President of Product Success at GRAPHISOFT. “The industry’s recognition of this app energizes our commitment to developing cutting-edge, best-in-class software solutions for architects and designers.”

About The Architect’s Newspaper

[The Architect’s Newspaper](#) speaks directly to leaders in architecture and design with news, products, developments, trends, and updates. Through our magazine, *AN Interior*, our outreach to the design community has grown

enormously over the past five years. The [Best of Products Awards](#) is an opportunity for designers and manufacturers to reach our audience of 1,000,000 readers – an eclectic mix of top-tier architects, designers, and taste-makers.

About BIMx

Bridge the gap between the design studio and the construction site with award-winning BIMx, the most popular presentation and coordination app for all project stakeholders. BIMx features the 'BIM Hyper-model' – a game-like navigation tool that helps anyone explore the building model and understand project deliverables. Real-time model cut-throughs, in-context measuring and project markups in the model context make BIMx your best on-site BIM companion. [Discover BIMx](#).

About GRAPHISOFT

[GRAPHISOFT](#)® empowers teams to create great architecture, through award-winning software solutions, learning programs, and professional services for the Architecture, Engineering, and Construction industry. **Archicad**®, the architects' BIM software of choice, offers a complete end-to-end design and documentation workflow for architectural and integrated architectural and engineering practices of any size. **BIMx**®, the most popular mobile and web BIM app, extends the BIM experience to include all stakeholders in the building design, delivery, and operations lifecycle. **BIMcloud**®, the AEC industry's first and most advanced cloud-based team collaboration solution, makes real-time collaboration possible across the globe regardless of the size of the project and the speed or quality of the team members' network connection. GRAPHISOFT is part of the Nemetschek Group. To learn more visit www.graphisoft.com
