GRAPHISOFT customers among first to benefit from top quality data exchange with engineers thanks to IFC4 Certification of ARCHICAD

BUDAPEST, June 7, 2019 – GRAPHISOFT®, developer of ARCHICAD, has announced an important milestone in its support for OPEN BIM, being among the first to receive IFC4 Reference View Export Certification (Architectural Reference Exchange).

A pioneer in the OPEN BIM movement, GRAPHISOFT implements the universal open BIM approach based on open standards and workflows using the buildingSMART data model, which provides benefits for the collaborative

design, construction and operation of buildings.

"ARCHICAD is recognized internationally as the BIM solution providing the most comprehensive IFC import and export. ARCHICAD users have absolute control to determine all the parameters of the elements to be included in the IFC file," said Miklos Szovenyi-Lux, OPEN BIM Program Manager, GRAPHISOFT. "At GRAPHISOFT, we believe that providing open collaboration workflows is in the best interest of our customers and the industry as a whole to achieve greater productivity and ultimately a better built environment."

IFC4 Reference View facilitates high quality coordination workflows for the design disciplines: architecture, structural engineering and building services.

The certified IFC4 Reference View 1.2 Export will be available in ARCHICAD 23, the latest version of GRAPHISOFT's award-winning BIM solution for architects, which was announced in May.

About GRAPHISOFT
GRAPHISOFT® ignited the BIM revolution in 1984 with ARCHICAD®, the industry-first BIM software for architects. GRAPHISOFT continues to lead the industry with innovative solutions such as its revolutionary BIMcloud®, the world's first real-time BIM collaboration environment; and BIMx®, the world's leading mobile app for lightweight access to BIM for non-professionals. GRAPHISOFT is part of the Nemetschek Group. To learn more visit www.graphisoft.com or follow us on Twitter at @GRAPHISOFT.
