GRAPHISOFT delivers award-winning ARCHICAD 23

BUDAPEST, September 23, 2019 – GRAPHISOFT, the leading Building Information Modeling software solution provider for architects and designers, announced today the global rollout of ARCHICAD® 23.

The latest version of ARCHICAD delivers unprecedented software responsiveness, advanced modeling capabilities for prefabricated structures, and best-in-class multidisciplinary workflows. In particular, ARCHICAD 23 significantly improves the speed of the most essential daily processes such as software startup, file opening, working in multi-project environments and navigating between different views of the BIM project; the brand-new Opening, Column and Beam tools increase modeling accuracy and

interoperability with engineering disciplines.

Based on the introduction of ARCHICAD 23 in June and enthusiastic AEC industry feedback, ARCHICAD 23 has won the [2019 Architect's Newspaper 'Best of Products' award](#) in the Tech: Design Tools category as well as the [2019 AIA 'Best of Show' awards](#). "We are proud that ARCHICAD 23 has generated so much excitement among AEC technology analysts," said Akos Pfemeter, Vice President for Global Marketing at GRAPHISOFT. "Their feedback helps us continue to do what we do: develop best-in-class software solutions for architects and designers. Even more so, we are thrilled with the enthusiastic endorsements from our customers!"

"Just finished working my way through the ARCHICAD 23 new features list and yes, I am impressed. In a way, the list of features is close to reading my ARCHICAD wish list," said Kevin Lee, Associate Director (BIM), Tonkin Zulaikha Greer Architects.

Effective today, the International, US, UK and Ireland, German, and Austrian localized packages are available for download on the official [download site](#). Customers worldwide can contact local [ARCHICAD resellers](#) for specific language shipping dates for each of the 27 localized packages that will become available during the remainder of 2019.
