# Graphisoft's Archicad Wins 'BIM Product of the Year' Eleventh Year in a Row

*With Archicad, BIM professionals can design and deliver inspiring projects of any size by integrating people, workflows, and information in real-time.*

**LONDON, November 16, 2021 – Archicad and BIMx, Graphisoft's award-winning Building Information Modeling (BIM) software applications, have won *BIM Product of the Year* and *Mobile Technology of the Year* respectively in the annual Construction Computing Awards. Affectionately known as 'The Hammers,' the Construction Computing Awards are nominated and voted for by industry-wide experts and design professionals to recognize innovative solutions and projects that are actively deployed and in use today.**⊠

Released in July, [Archicad 25](#) is one of the most user-driven versions yet, with powerful enhancements to design, visualization, documentation, and collaboration capabilities that are a direct response to user feedback. With enhanced usability, navigation, and accurate quantity take-offs, Archicad empowers teams to create great architecture — by working in a single software from early concept designs through to construction documents.

[BIMx](#), the Mobile Technology award winner, bridges the gap between the design studio and the construction site with a game-like navigation experience when exploring a building model. This award-winning solution improves the understanding of project deliverables and keeps all team members on task. Archicad users benefit from the unique advantage of its 3D visualization engine, allowing users to display and explore BIM models without size limits.

"This continuous recognition by users and industry experts alike reinforces our commitment to developing best-in-class software solutions for architects and designers," said Adrian Girling, Managing Director, Graphisoft UK and Ireland.

In addition to the two prestigious awards won by Graphisoft, Archicad power users [Bond Bryan Digital](#) took home the *BIM Project of the Year* award for **Information Hub for Gen Zero**.

**About Archicad**

Design and deliver projects of any size with Archicad's powerful suite of built-in tools and user-friendly interface that make it the most efficient and intuitive BIM software on the market. Featuring out-of-the-box design documentation, one-click publishing, photo-realistic rendering, and best-in-class analysis. Archicad lets you focus on what you do best: design great buildings. [Discover what's new in Archicad](#).

**About BIMx**

Bridge the gap between the design studio and the construction site with award-winning BIMx, the most popular presentation and coordination app for all project stakeholders. BIMx features the 'BIM Hyper-model' – a game-like navigation tool that helps anyone explore the building model and understand

project deliverables. Real-time model cut-throughs, in-context measuring and project markups in the model context make BIMx your best on-site BIM companion.  Discover BIMx.
